DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, 18-23 and 28-52, drawn to a recombinant bacterial cell comprising an isolated nucleic acid construct, said cell expressing at least one alkalizing enzyme.

Group II, claim(s) 14-17, drawn to a method for reducing acidification of dental plaque in a subject.

Group III, claim(s) 24, drawn to an isolated nucleic acid comprising nucleotide sequence SEQ ID NO: 1.

Group IV, claim(s) 25, drawn to an isolated nucleic acid comprising nucleotide sequence SEQ ID NO: 2

Group V, claim(s) 26, drawn to an isolated nucleic acid comprising nucleotide sequence SEQ ID NO: 3.

Group VI, claim(s) 27, drawn to an isolated nucleic acid comprising nucleotide sequence SEQ ID NO: 4.

Group VII, claim(s) 53-59, drawn to a method for treating dental carries.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-VII appears to be a bacterial cell expressing an alkalizing enzyme.

However, Chen *et al.* (Infection and Immunity, 1996; 64(s): 585-592) disclose the use *Streptococcus salivarius* urease in dental plaque *Streptococcus* (see abstract).

Therefore, the technical feature linking the inventions of Groups I-VII does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the art.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
